 Bijnor, Uttar Pradesh  6398050375  sr.qa.inshaparveen@gmail.com  LinkedIn  Github  Portfolio

Professional Summary

Results-driven **Senior QA & Automation Engineer** with 4+ years of experience architecting scalable automation frameworks and leading quality initiatives across web, mobile, and API platforms. Proven expertise in **Selenium, Appium, REST Assured, and CI/CD pipelines** with a strong focus on **performance, reliability, and scalability testing**. Adept at collaborating with cross-functional teams to deliver defect-free releases, reduce cycle times, and enhance customer experience. Recognized for **mentoring teams, optimizing processes, and driving measurable improvements in product quality**.

Core Skills

- Automation & QA: **Selenium WebDriver, Appium, TestNG, JUnit, REST Assured, Postman**
- Programming: **Java, Python, SQL**
- DevOps & CI/CD: **Jenkins, Git, Azure DevOps, AWS Cloud**
- Test Management: **Jira, TestRail, ALM**
- Performance & Scalability: **JMeter, BrowserStack, Charles Proxy**
- Methodologies: **Agile/Scrum, SDLC, API Testing, Mobile Automation, Cross-Browser Testing**

Professional Experience

Senior Software Engineer

BrokerApp— [Delhi, Delhi]

Dec 2025 - Present

- Architected API automation framework** from scratch using REST Assured, reducing manual effort by 60% and improving coverage.
- Led payment gateway testing** ensuring secure, reliable transactions across multiple integrations.
- Partnered with marketing & product teams to translate business requirements into **robust test strategies**, accelerating release cycles.
- Identified and resolved critical defects early**, reducing production issues by 35%.

Software Engineer

Bebo Technologies — [Chandigarh, Punjab]

Nov 2024 – Nov 2025

- Spearheaded automation strategy for web & mobile apps, achieving 90% regression coverage.
- Integrated automation into Jenkins CI/CD pipelines, cutting deployment validation time by 40%.
- Conducted performance benchmarking with JMeter, ensuring scalability for 10k concurrent users.
- Mentored junior engineers, elevating team capability in automation best practices.

Software Engineer

Netprophets Cyber Private Limited — [Noida, Uttar Pradesh]

June 2022 – Nov 2024

- Automated regression & smoke suites with Selenium & TestNG, reducing manual testing effort by 50%.
- Built cross-browser/device testing frameworks, ensuring consistent UX across platforms.
- Contributed to CI/CD pipeline setup in Jenkins, enabling seamless automated deployments.
- Wrote SQL queries for data validation and integrity checks in complex systems.
- Executed manual functional, regression, and exploratory testing to validate critical business workflows and edge cases.
- Designed and maintained manual test cases and checklists for new feature releases, ensuring complete coverage before automation.
- Collaborated with developers and product owners to perform requirement analysis, test scenario creation, and defect triage.
- Conducted UAT (User Acceptance Testing) with stakeholders, ensuring product readiness before production rollout.

Education

- Bachelor of Technology (B.Tech) in Computer Science
Abdul Kalam Technical University — [Lucknow, Uttar Pradesh]
Graduated: June 2022
